MAINETRACK

Mainetec has introduced our Mainetrack Asset Management App to:

- Tracks and records asset information
- Documents asset maintenance history and trends
- Captures wear rates
- Tracks condition of asset and record damage
- Provide downloadable reports for analysis and presentation

The benefits include

- Forecasting asset life with regular input of field measurements.
- Pre-set wear limits for production and maintenance forecasts
- Cloud based system to ensure integrity and accuracy of data from inspections is retained.
- Easy to use dashboard available to users to view single asset or total fleet assets across individual sites
- Inspections are completed on tablets with consistent inspection regime parameters
- Mainetec have also developed the Mainesafe App for further asset support
